Your Heart
It works hard for you.

Follow the path blood takes through the heart:

1. From the body into the right atrium
2. From the right atrium into the right ventricle
3. From the right ventricle through the pulmonary artery to the lungs
4. From the left atrium into the left ventricle
5. From the left atrium into the left ventricle
6. From the left ventricle through the aorta to all parts of the body

From the lungs into the left atrium
From the right atrium into the right ventricle
From the left atrium into the left ventricle
From the left ventricle through the aorta to all parts of the body
