**Word Associations Quick Activity**

As a class, generate a list of words and phrases associated with tobacco use. The words might include: cigarette, nicotine, heart disease, cancer, tar, smell, bad breath, cough, pack, smoke, ashes, lungs, taste, eyes and wrinkles.

Then challenge students to create their own word-search puzzle or another kind of word puzzle, using words from the list on the chalkboard. When their puzzles have been completed, encourage students to exchange papers and find and circle the tobacco use words in each other’s puzzles. Encourage students to also share their puzzles with other students in the school by publishing them in your school newspaper.
