

PLEASE JOIN THE CONGRESSIONAL HEART AND STROKE COALITION

Heart disease is our nation's number one killer. Stroke is now the fifth leading cause of death. Both are major causes of significant, long-term disability. An estimated 91.1 million American adults suffer from some form of cardiovascular disease. The direct and indirect costs of cardiovascular diseases and stroke total more than \$316.6 billion.

Join the fight against heart disease, stroke, and other cardiovascular diseases by becoming a member of the Congressional Heart and Stroke Coalition. The Coalition works to raise awareness of the seriousness of cardiovascular diseases and acts as a resource center on heart and stroke issues including: biomedical research; quality and availability of care; and health promotion/disease prevention. The Coalition also works to advance public policy aimed at fighting cardiovascular diseases. No membership dues or fees are collected.

*****PLEASE JOIN*****
