

American Heart Association®

Healthy Smiles, Healthy Hearts™

Caring for your smile means caring for your heart.

At this office, we screen for blood pressure because we care for your overall health.

-  High blood pressure (BP) often has no symptoms.
-  It can increase risk for heart disease and stroke.
-  A quick BP check helps us protect your health.

Oral health is connected to heart health — what happens in your mouth can affect your heart.
