

Quality Improvement Lecture Series at HeadQuarters ISC 2023

American Heart Association works with hospitals and health systems across the country to study quality improvement challenges through Implementation Science. New to ISC this year, the Quality Improvement Lecture Series will feature model sharing from hospital participants across various projects including, statewide systems of care, cryptogenic stroke, rural health, ICH and more.

These 10-minute presentations are packed with ideas for clinicians working to improve their own patients' journeys.

Plus, listen as the ICH Proposal Competition participants share their research proposals as they compete for victory.

Wednesday, February 8th

10:15 - 10:25 AM **Get With The Guidelines®- Stroke Data Challenge: Work with a Novel Linked Dataset on The Precision Medicine Platform to Address Social Determinants of Health and Resulting Impact on Stroke Care**
