

IMPLEMENT-HF™

IT IS PROJECTED THAT BY **2030**
MORE THAN 8 MILLION
PEOPLE WILL HAVE **HEART FAILURE**

Vision:

Our vision is to create a healthcare ecosystem for heart failure that emphasizes implementation science and patient engagement. IMPLEMENT-HF will work to **build a bridge between care settings**, healthcare professionals and patients to achieve precise heart failure management and improve outcomes for all patients.

Goal:

To increase the **healthy days at home** for all patients with heart failure.

Diagnosis:

Partnering with clinical care team to make appropriate diagnosis

Treatment:

Ensuring guideline-based care for every patient: including provision of quadruple medical therapy and assessing patients to identify unmet social needs

Transitions of Care:

Shared decision making and collaboration to effectively transition patients across the continuum of care

Health Management:

Patient tools for remote self-management and communication with care teams to ensure more healthy days at home
