TIPS FOR SUCCESS

If you’re overweight, even a slight weight loss can reduce high blood pressure.

Eat a healthy diet of vegetables, fruits, whole grains, beans, legumes, nuts, plant-based proteins, lean animal proteins like fish and seafood.

Limit sugary foods and drinks, red or processed meats, salty foods, refined carbohydrates and highly processed foods.

Physical activity helps control blood pressure, weight and stress levels.

Every time you smoke, vape or use tobacco, the nicotine can cause a temporary increase in blood pressure.

Short sleep (less than 7 hours) and poor-quality sleep are associated with high blood pressure.

HOW TO MANAGE BLOOD PRESSURE

UNDERSTAND READINGS

Make smart choices and swaps to build an overall healthy eating style. Watch calories and eat smaller portions.

Blood pressure is typically recorded as two numbers, written as a ratio like this:

117/76

Read as “117 over 76” millimeters of mercury.

A diagnosis of high blood pressure must be confirmed with a health care professional. Any unusually low blood pressure readings should also be evaluated.

Health care professionals can take blood pressure readings and provide recommendations.

EAT SMART

Eat a healthy diet of vegetables, fruits, whole grains, beans, legumes, nuts, plant-based proteins, lean animal proteins like fish and seafood.

Limit sugary foods and drinks, red or processed meats, salty foods, refined carbohydrates and highly processed foods.

MOVE MORE

Physical activity helps control blood pressure, weight and stress levels.

MANAGE WEIGHT

If you’re overweight, even a slight weight loss can reduce high blood pressure.

NO NICOTINE

Every time you smoke, vape or use tobacco, the nicotine can cause a temporary increase in blood pressure.

SLEEP WELL

Short sleep (less than 7 hours) and poor-quality sleep are associated with high blood pressure.
