

# A. Report Card: general checklist

Event number / date VO131 3-9-12

No / Intermediate / Yes

Was the team leader clearly identified?

Was the scene orderly and quiet?

Was the defibrillator applied quickly?

Was CPR started promptly?

Were pauses in CPR delivery minimized?

Was CPR of subjectively high quality?

Were peri-shock pauses minimized?

Was an airway secured efficiently?

Comments Great team leadership, good effort by all, but  
but remember to MINIMIZE pauses in CPR, esp. before/after shocks

## B. Report Card: CPR quality analysis

Event number / date VO131 3-9-12

Mean compression rate

102

Mean compression depth (mm)

43

Compression fraction

82%

Mean peri-shock pause duration (sec)

32.6

Mean ventilation rate

11

Comments Great rate and hands on time; remember to keep  
Pre-shock and post-shock pauses short to improve shock success
