When it comes to health and longevity, where you live matters. That is unacceptable. Together with our Board of Directors, volunteers and supporters, we are redoubling our efforts to address health disparities and societal inequities to help create a Los Angeles where everyone can live a long and healthy life.

WE ARE YOUR AMERICAN HEART ASSOCIATION

OUR PRIORITIES INCLUDE:

**Increasing food security**
We are transforming the food environment to make healthy food more affordable and accessible in all neighborhoods, but especially in communities experiencing the greatest inequities to accessing healthy food.

**Building active communities**
We are addressing barriers and transforming communities so that kids and families feel safe to walk, bike, play and be active where they live.

**Addressing chronic conditions**
We are improving blood pressure management for more than 2 million people, 2/3 of whom are impacted by systemic inequities that limit access to health care.

Meet our Los Angeles Board of Directors

Richard Shemin, MD
UCLA Health

Paul Craig
Keck Medicine of USC

John Harald, MD
Cedars-Sinai

Bob Lundy
Hooper, Lundy & Bookman PC

Richard Azar
