

5TH ANNUAL  
**LAS VEGAS**  
**GET WITH THE GUIDELINES**  
**CARDIOVASCULAR & STROKE**  
**WORKSHOP**

Friday, May 4, 2018

8:00 am to 4:15 pm

Registration to begin at 7:00 am

7 Continuing Education Credits

Price: \$25

Las Vegas Springs Preserve | Las Vegas, NV

### Program Purpose

This educational program will provide healthcare professionals with information on the latest scientific updates and guidelines, technology, and thought-provoking topics to improve patient care related to cardiovascular and stroke issues. The long-term effect of the workshop will be to help promote improvement in the quality of care, improve outcomes, and quality of life for all patients.

### Target Audience

The target audience includes physicians, physician assistants, nurses, nurse practitioners, pharmacists, emergency medical services (EMS) personnel, and radiologic technologists. Sub-specialties include neurology, cardiology, emergency medicine, telemetry, critical care, medical/surgical, intensive care, and rehabilitation.

### CE Credits

There are 7 continuing education credits available for physicians, physician assistants, nurses, nurse practitioners, pharmacists and EMS personnel and 8.5 continuing education credits available for radiologic technologists.

### Course Learning Objectives

#### Attendees will be able to:

- List two examples of how stroke patient population will benefit from the healthcare provider's adherence to the American Heart Association/American Stroke Association guidelines.
- List two examples of how cardiovascular disease patient population will benefit from the healthcare provider's adherence to the American Heart Association/American Stroke Association guidelines.
- Describe two criteria used to identify Left Bundle Branch Block on 12-Lead EKG.
- Identify two conditions that frequently mimic ST-segment elevation myocardial infarction (STEMI) on 12-Lead EKGs.
- Describe cardiopulmonary resuscitation and identify two elements of resuscitation practice in the field by EMS.
- Describe the major risk factor with untreated atrial fibrillation (AFib).
- List two criteria for stem cell patient selection.
- List two facilities where patients can travel outside of Nevada for Stem Cell Clinical Trial.
