BACKGROUND
GWTG-Coronary Artery Disease (CAD) was the flagship GWTG module for AMI quality improvement from 2005-2010. In April 2017, The AHA was pleased to announce the relaunch of GWTG-CAD which is fully supporting the Mission: Lifeline program and cardiovascular quality improvement activities. Similar to the AHA’s other Get With The Guidelines programs, GWTG- CAD is supported by IQVIA, formerly QuintilesIMS, and was built with familiar interactive features and streamlined functionality. Together, the AHA and IQVIA, offer unmatched customer service along with quality improvement and systems of care implementation expertise.

½ Price for Critical Access Hospitals

GWTG-CAD SUPPORTS MISSION: LIFELINE PROGRAM
Since 2010, the AHA’s Mission: Lifeline program has recognized hospitals for their outstanding performance in high quality systems of care performance by meeting or exceeding guideline therapy recommendations in treating patients presenting with STEMI heart attacks. GWTG-CAD data is the only data source that will be analyzed for Mission: Lifeline STEMI and NSTEMI Recognition.

MISSION: LIFELINE REGIONAL REPORTS ARE BACK
- NEW and Improved Mission: Lifeline Reports ARE available
  - GWTG-CAD Option 1 and 2 users have real time report access including the following:
    - Mission: Lifeline Data updated every 24 hours
    - Regional level data to include regional adherence to Mission: Lifeline STEMI measures, regional performance over time, regional performance compared to hospital, state and national performance, stacked bar graphs for multidisciplinary process measures, and all with user friendly data and graph export features to excel, PDF and Power Point.
    - Scheduling regional/state Mission: Lifeline task force meetings are more flexible
    - Regions can set their own data submission date expectations in addition to those that are set for the quarterly report refresh
    - Mission: Lifeline Report data can be used in preparation for monthly multidisciplinary STEMI meetings
  - GWTG-CAD Option 3 users will receive Mission: Lifeline reports that are refreshed on a regularly scheduled quarterly basis
ADDITIONAL BENEFITS OF GWTG-CAD

- Immediate real-time (within 24 hours) access to Mission: Lifeline measures data and Mission: Lifeline reports
- NEW Mission: Lifeline STEMI Receiving Center Reporting Measures
  - Provides more in depth look at the STEMI System performance
- Competitively priced options for 2019
- Expert consultative services by familiar AHA Quality Improvement Staff
- Streamlined, robust yet lean, user friendly data collection form
- <110 total data elements
- STEMI only data submission option
- Ability to create custom data elements
- Multiple benchmarking options
- Time Tracker Feedback Forms (Coming soon)

EXAMPLE OF A NEW MISSION: LIFELINE REGIONAL REPORT METRIC

Percentage of cath lab activations that occur prior to the EMS patient’s arrival compared to after arrival when pre-hospital STEMI is noted, and pre-arrival notification was given.
