

YOU ASKED, THE AHA LISTENED!

GWTG-CAD's STEMI Referring Form is Available
ASK ABOUT ENROLLING TODAY!

STEMI Referring Hospitals are an integral participant in a STEMI System of Care and deserve a STEMI data collection solution & patient management tool designed specially to serve the specific needs of a referring hospital.

What makes the AHA's new GWTG-CAD STEMI Referring Form a great choice?

- Minimal STEMI data collection option to support internal quality improvement activities, and care coordination with EMS and the interfacility transfer team(s).
- Super light lift for the smaller referring hospitals.
- Patient level data collection can be accomplished in the 'same shift' via mobile device or tablet
- Helps identify process improvement opportunities, such as:
 - Time to first 12 Lead ECG
 - Time to fibrinolytic administration
 - Door-In-Door-Out times
 - And More!
- Full access to real-time advanced analytics and reports, including the Mission: Lifeline Hospital level and Regional reports.
- Individualized on-boarding and ongoing support from local and national AHA Quality Improvement Staff.
- Participating hospitals are eligible for National Recognition through the Mission: Lifeline STEMI program
 - Participating hospitals are also eligible to participate in the NEW Mission: Lifeline STEMI Referring Hospital DIDO (Door In-Door Out) Challenge
- Fully supports the AHA/TJC Acute Heart Attack Ready Certification program

GWTG-CAD's new STEMI Referring Form allows 24/7 STEMI Referring and Dual Strategy Hospitals the opportunity to own Quality Improvement efforts and further solidifies a commitment to STEMI Systems of Care and to STEMI patients treated.

For a one on one product demonstration and/or pricing information, contact MissionLifeline@heart.org or your local AHA Quality Improvement Director.
