#### 2021 MISSION: LIFELINE EMS RECOGNITION APPLICATION

Welcome to the 2021 Mission: Lifeline® EMS Recognition web-based application.

Application period closes March 30, 2021 at 23:59.59 CT.

#### \*\*ALL APPLICANTS PLEASE READ THE FOLLOWING GUIDANCE\*\*

The Mission: Lifeline team at the American Heart Association is excited to continue recognizing EMS agencies for applying the most up-to-date evidence-based treatment guidelines to improve care and outcomes in the communities served.

Applicants can access the application as many times as needed until the application submission deadline on March 30, 2021 at 11:59pm CST, via the unique application link provided. Save this link as a favorite. **Any data entered will be automatically saved, there is no save option.** When re-accessing the application, the unique link will direct you to the place in the application where you last left off.

For issues with returning to an open application, please email Missionlifeline@heart.org for assistance.

Once the application is completed and submitted, the application will close and will not allow further access via the unique link. The application can be reopened to make updates if needed via a new application link. The new link will

reset the application to first page and can any data can be revised and the application resubmitted. Requests to re-open an application after final submission will only be processed after the March 30, 2021 submission deadline. To request your application be re-opened please email Missionlifeline@heart.org or contact your local AHA Quality Improvement Manager.

For questions please email Missionlifeline@heart.org or reach out to your local AHA Quality Improvement Manager.

If ready to begin the application - scroll to the bottom of this introduction page and select **YES** then click **NEXT**.

Thank you for your participation in Mission: Lifeline EMS Recognition.

To access additional resources for 2021 Mission: Lifeline EMS Recognition please visit our <u>Mission: Lifeline EMS Recognition</u> web page.

Are you ready to begin the 2021 Mission: Lifeline EMS Application?

- YES (click the "Next" button in the lower right corner of your screen)
- NOT YET (please close your browser window)

# **Individual, Joint or Regional Application**

Select the Application that will be comple	eted and submitted.	
O Individual Application (Stand alone or Te	eam option)	
O Joint Application (Stand alone or Team of	option)	
Regional Application		
First Agency Contact Information (Inc	lividual or Joint Application)	
AGENCY APPLICATION		
* Please provide the contact and agency	/ information of the individual w	/ho
should receive the final Mission: Lifeline	award notification. Note that the add	lress you
provide may be used as a point of reference for your agency i	n AHA-produced EMS Recognition maps.	
For agencies who applied for recogni	tion in 2020, we've inserted t	he
contact agency you provided in the 2	021 application. Feel free to ι	make
changes if necessary. Otherwise, if the question.	ere are no changes, skip to t	the next
**If you selected Joint application please	e provide the information for the	e FIRST
of the two EMS agencies submitting a jo	int application below. Then, yo	u will be
asked to provide the information for the	SECOND agency.	
**If you selected Regional application (m	nultiple EMS agencies in the sa	ame
geographical region), please provide the	region name and contact info	rmation of
the individual who should receive the fin	al Mission: Lifeline award notifi	cation.

STEMI Receiving or Referring Trigger
* Please select transport destination of the STEMI patients that will be reported for Mission: Lifeline EMS Recognition: (check all that apply)
STEMI <b>Receiving</b> Center (Transports from the field to a PCI hospital(s).

STEMI Referring Hospital (Transports patients from the field to a Non-PCI hospital(s).
Quarter 1 Measure 1
QUARTER 1
* Questions with an asterisk (*) are mandatory. Enter a zero "0" when there is no data to report.
*Measure 1: Percentage of patients with non-traumatic chest pain/ACS symptoms (which may include chest pain or discomfort in other areas of the body of suspected cardiac origin, shortness of breath, sweating, nausea, vomiting, dizziness, and atypical or unusual symptoms) in patients ≥35 years of age, treated and transported by EMS who received a pre-hospital 12 Lead ECG
Inclusion Criteria:  • Patients with non-traumatic chest pain/ACS symptoms  AND  • 35 years or older  AND
Transported to a hospital
Enter your numbers in the boxes below:
0 Quarter 1 Denominator Volume- Total number of patients who meet the above criteria
Quarter 1 Numerator - Number of patients in the denominator volume who received a pre-hospital 12 lead ECG

Measure 1: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume who did not receive a pre-hospital 12 Lead ECG

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 1 Outlier Volume

## Measure 1: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

 Indication of the presence of cardiac arrest at any time during this EMS event

### **Quarter 1 Measure 2**

## Measure 1 Calculated Percentage for Quarter 1

Below is the percentage calculated based on the data that was input on the previous page.

Quarter 1 Measure 1 Percentage: 0%

\*Measure 2: The percentage of hospital notifications or 12 Lead ECG transmissions suggesting a STEMI alert (or Cardiac Cath Lab Activation), that are performed within 10 minutes of the first STEMI positive 12 Lead ECG in the field

## **Inclusion Criteria:**

• Patients 35 years or over

### **AND**

•With a STEMI noted on pre-hospital ECG (either 1st pre-hospital 12 Lead ECG or Subsequent pre-hospital 12 Lead ECG)

### **AND**

Transported to a hospital

Enter your numbers in the boxes below:

0	Quarter 1 Denominator Volume- Total number of patients who meet the above
inclusio	on criteria

0	Quarter 1 Numerator - Number of patients in the denominator volume where
the ho	spital notification/activation was performed within 10 minutes of the first STEMI

Positive pre-hospital 12 Lead ECG

Measure 2: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, where the hospital notification/activation was performed in **GREATER** than 10 minutes of the first STEMI Positive pre-hospital 12 Lead ECG

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 1 Outlier Volume

## Measure 2: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport
- Indication of the presence of cardiac arrest at any time during this EMS event
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care

0 Quarter 1 Exclusions

## Block 31

## Measure 2 Calculated Percentage for Quarter 1

Below is the percentage calculated based on the data that was input on the previous page.

Quarter 1 Measure 2 Percentage: 0%

\*Measure 3: Percentage of patients treated and transported directly to a STEMI Receiving Center, with EMS First Medical Contact to device time ≤90 Minutes and/or EMS First Medical Contact to PCI ≤120 Minutes when transport time ≥45 minutes and Door to Balloon ≤30 Minutes. (When destination facility = STEMI Receiving Center)

## **Inclusion Criteria:**

• Patients 18 years of age or older

#### **AND**

With a STEMI noted on the pre-hospital first ECG

\*\*If STEMI noted on subsequent ECG:

- 1. Exclude from the denominator those patients who have an EMS FMC to PCI ≥90 minutes or ≥120 minutes when transport time ≥45 minutes
- Include those patients in the denominator with EMS First Medical Contact to device time ≤90 Minutes and/or EMS First Medical Contact to PCI ≤120 Minutes when transport time ≥45 minutes and Door to Balloon ≤30 Minutes.

3.

#### AND

Transported to a STEMI Receiving Center (Primary PCI)

#### **AND**

Primary PCI was performed

## Enter your numbers in the boxes below:

0	Quarter 1 Denominator Volume - Total number of patients who meet the above
inclusi	on criteria

0 Quarter 1 Numerator - Number of patients in the denominator volume where EMS First Medical Contact to device time ≤90 Minutes and/or EMS First Medical Contact to PCI ≤120 Minutes when transport time ≥45 minutes and Door to Balloon <30 Minutes

### **Quarter 1 Measure 3**

Measure 3: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, where the total time from FMC (first medical contact) to device activation/Primary PCI was **GREATER** than 90 minutes or **GREATER** than 120 min where travel time was  $\geq$  45 min and D2B is  $\leq$  30 min

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

\${e://F Quarter 1 Outlier Volume

### Measure 3: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport (prehospital/in-hospital)
- Delay caused by patient experiencing cardiac arrest and the need for intubation (prehospital/in-hospital)
- Delay caused by initial prehospital ECGs being negative for STEMI
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care. (prehospital/in-hospital)

 Delay caused by difficulty in accessing femoral or radial artery (in the cath lab)

0 Quarter 1 Exclusions

### Q1 Measure 4

## Measure 3 Calculated Percentage for Quarter 1

Below is the percentage calculated based on the data that was input on the previous page.

Quarter 1 Measure 3 Percentage: 0%

\*Measure 4: Percentage of STEMI patients treated and transported to a STEMI Referring Hospital for reperfusion A) With a Door-to-Needle time of ≤30 Minutes OR B) Initial EMS FMC to PCI of the transfer for PCI patient ≤120 Minutes.

## **Inclusion Criteria:**

• Patients 18 years of age or older

### **AND**

With a STEMI noted on pre-hospital ECG

### **AND**

Transported to a STEMI Referring Center

#### AND

Thrombolytics Administered

#### **OR**

Patients are transported to a STEMI Receiving Center for Primary PCI

### Enter your numbers in the boxes below:

Quarter 1 Denominator Volume - Total number of patients who meet the above criteria

0 Quarter 1 Numerator - Number of patients in the denominator volume treated for reperfusion A) With a Door-to-Needle time of ≤30 Minutes OR B) Initial EMS FMC to PCI of the transfer for PCI patient ≤120 Minutes

\*Measure 4: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, who were transported directly to a STEMI Referring center AND had fibrinolytic therapy administered in GREATER than 30 minutes OR transferred to a STEMI Receiving Center and had Primary PCI Performed in GREATER than 120 Minutes

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 1 Outlier Volume

\*Measure 4: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport (prehospital/in hospital)
- Delay caused by patient experiencing cardiac arrest and the need for intubation (prehospital/in hospital)
- Delay caused by initial and/or subsequent ECGs being negative for STEMI (prehospital/in-hospital)
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care. (prehospital/in hospital)

0 Quarter 1 Exclusions

## **Q1 Plus Measure**

## Measure 4 Calculated Percentage for Quarter 1

Below is the percentage calculated based on the data that was input on the previous page.

Quarter 1 Measure 4 Percentage: 0%

\* **PLUS Measure:** Of those patients reported in the EMS Measure 1 numerator (patients with an initial complaint of non-traumatic chest pain/ACS symptoms who are ≥ 35 years of age who received a 12 Lead ECG), the percentage of 12

Lead ECG's **performed with in 10 minutes** of EMS First Medical Contact. (Required for reporting but not used for baseline recognition analysis)

### **Inclusion Criteria:**

Patients with non-traumatic chest pain/ACS symptoms

#### AND

• 35 years or older

#### **AND**

Had a prehospital 12 Lead ECG performed

#### **AND**

• Who were transported by EMS (to either a STEMI Referring Hospital or a STEMI Receiving Center

## Enter your numbers in the boxes below:

\$\{e://F| Quarter 1 Denominator - Total number of patients who meet the above criteria (the denominator for the PLUS measure has been auto-populated based on the numerator volume entered for Measure 1)

Quarter 1 Numerator - Number of patients in the denominator volume who received a pre-hospital 12 lead ECG within 10 minutes

\*PLUS Measure: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, who did not receive a 12 Lead ECG within 10 minutes of EMS First Medical Contact.

Check the math: Adding the outlier volumes to the numerator volumes will equal

the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 1 Outlier Volume

\*PLUS Measure: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

 Delay caused by the patient experiencing cardiac arrest and the need for intubation

0 Quarter 1 Exclusions

### **Quarter 2 Measure 1**

## Plus Measure Calculated Percentage for Quarter 1

Below is the percentage calculated based on the data that was input on the previous page.

Quarter 1 Plus Measure Percentage: 0%

Click "Next" to enter your data for Quarter 2. If you would like to enter this data at a later time, please close your browser. **All data entered will be saved**. To re-access the application, use the unique application link.

#### **QUARTER 2**

- \* Questions with an asterisk (\*) are mandatory. Enter a zero "0" when there is no data to report.
- \*Measure 1: Percentage of patients with non-traumatic chest pain/ACS symptoms (which may include chest pain or discomfort in other areas of the body of suspected cardiac origin, shortness of breath, sweating, nausea, vomiting, dizziness, and atypical or unusual symptoms) in patients ≥35 years of age, treated and transported by EMS who received a pre-hospital 12 Lead

### **Inclusion Criteria:**

Patients with non-traumatic chest pain/ACS symptoms

### **AND**

• 35 years or older

### **AND**

Transported to a hospital

## Enter your numbers in the boxes below:

0	Quarter 2 Denominator Volume- Total number of patients who meet the above
criteria	

Quarter 2 Numerator - Number of patients in the denominator volume who received a pre-hospital 12 lead ECG

Measure 1: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume who did not receive a pre-hospital 12 Lead ECG

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 2 Outlier Volume

## Measure 1: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

Indication of the presence of cardiac arrest at any time during this EMS event

### **Quarter 2 Measure 2**

## Measure 1 Calculated Percentage for Quarter 2

Below is the percentage calculated based on the data that was input on the previous page.

Q2 Measure 1 Percentage: 0%

\*Measure 2: The percentage of hospital notifications or 12 Lead ECG transmissions suggesting a STEMI alert (or Cardiac Cath Lab Activation), that are performed within 10 minutes of the first STEMI positive 12 Lead ECG in the field

## **Inclusion Criteria:**

Patients 35 years or over

### **AND**

•With a STEMI noted on pre-hospital ECG (either 1st pre-hospital 12 Lead ECG or Subsequent pre-hospital 12 Lead ECG)

### **AND**

Transported to a hospital

Enter your numbers in the boxes below:

0	Quarter 2 Denominator Volume- Total number of patients who meet the above
inclusi	on criteria

Quarter 2 Numerator - Number of patients in the denominator volume where the hospital notification/activation was performed within 10 minutes of the first STEMI Positive pre-hospital 12 Lead ECG

Measure 2: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, where the hospital notification/activation was performed in GREATER than 10 minutes of the first STEMI Positive pre-hospital 12 Lead ECG

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 2 Outlier Volume

## Measure 2: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

Delay in patient or family providing consent for treatment and transport

- Indication of the presence of cardiac arrest at any time during this EMS event
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care

0 Quarter 2 Exclusions

### **Quarter 2 Measure 3**

## Measure 2 Calculated Percentage for Quarter 2

Below is the percentage calculated based on the data that was input on the previous page.

Q2 Measure 2 Percentage: 0%

\*Measure 3: Percentage of patients treated and transported directly to a STEMI Receiving Center, with EMS First Medical Contact to device time ≤90 Minutes and/or EMS First Medical Contact to PCI ≤120 Minutes when transport time ≥45 minutes and Door to Balloon ≤30 Minutes. (When destination facility = STEMI Receiving Center)

## **Inclusion Criteria:**

Patients 18 years of age or older

#### AND

With a STEMI noted on pre-hospital first ECG

\*\*If STEMI noted on subsequent ECG:

Exclude from the denominator those patients who have an EMS FMC to PCI >90 minutes or >120 minutes when transport time >45 minutes
Include those patients in the denominator with EMS First Medical Contact to
device time <90 Minutes and/or EMS First Medical Contact to PCI <120 Minutes
when transport time >45 minutes and Door to Balloon <30 Minutes.

### **AND**

Transported to a STEMI Receiving Center (Primary PCI)

#### **AND**

Primary PCI was performed

## Enter your numbers in the boxes below:

Quarter 2 Denominator Volume - Total number of patients who meet the above inclusion criteria

Quarter 2 Numerator - Number of patients in the denominator volume where EMS First Medical Contact to device time ≤90 Minutes and/or EMS First Medical Contact to PCI ≤120 Minutes when transport time ≥45 minutes and Door to Balloon <30 Minutes

## **Measure 3**: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, where the total time from FMC (first medical contact) to device activation/Primary PCI was **GREATER** than 90 minutes or **GREATER** than 120 min where travel time was  $\geq$  45 min and D2B is  $\leq$  30 min

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 2 Outlier Volume

## Measure 3: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport (prehospital/in-hospital)
- Delay caused by patient experiencing cardiac arrest and the need for intubation (prehospital/in-hospital)
- Delay caused by initial prehospital ECGs being negative for STEMI
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care. (prehospital/in-hospital)
- Delay caused by difficulty in accessing femoral or radial artery (in the cath lab)

### **Quarter 2 Measure 4**

## Measure 3 Calculated Percentage for Quarter 2

Below is the percentage calculated based on the data that was input on the previous page.

Q2 Measure 3 Percentage: 0%

\*Measure 4: Percentage of STEMI patients treated and transported to a STEMI Referring Hospital for reperfusion A) With a Door-to-Needle time of ≤30 Minutes OR B) Initial EMS FMC to PCI of the transfer for PCI patient ≤120 Minutes.

### **Inclusion Criteria:**

• Patients 18 years of age or older

#### **AND**

With a STEMI noted on pre-hospital ECG

#### **AND**

Transported to a STEMI Referring Center

#### **AND**

• Thrombolytics Administered

#### OR

Patients are transported to a STEMI Receiving Center for Primary PCI

## Enter your numbers in the boxes below:

0	Quarter 2 Denominator Volume - Total number of patients who meet the above
criteria	

0 Quarter 2 Numerator - Number of patients in the denominator volume treated for reperfusion A) With a Door-to-Needle time of ≤30 Minutes OR B) Initial EMS FMC to PCI of the transfer for PCI patient ≤120 Minutes

## \*Measure 4: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, who were transported directly to a STEMI Referring center AND had fibrinolytic therapy administered in GREATER than 30 minutes OR transferred to a STEMI Receiving Center and had Primary PCI Performed in GREATER than 120 Minutes

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 2 Outlier Volume

## \*Measure 4: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport (prehospital/in hospital)
- Delay caused by patient experiencing cardiac arrest and the need for intubation (prehospital/in hospital)
- Delay caused by initial and/or subsequent ECGs being negative for STEMI (prehospital/in-hospital)
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care. (prehospital/in hospital)

0 Quarter 2 Exclusions

### **Q2 Plus Measure**

## Measure 4 Calculated Percentage for Quarter 2

Below is the percentage calculated based on the data that was input on the previous page.

Q2 Measure 4 Percentage: 0%

\* **PLUS Measure:** Of those patients reported in the EMS Measure 1 numerator (patients with an initial complaint of non-traumatic chest pain/ACS symptoms who are > 35 years of age who received a 12 Lead ECG), the percentage of 12 Lead ECG's performed with in 10 minutes of EMS First Medical Contact. (Required for reporting but not used for baseline recognition analysis)

## **Inclusion Criteria:**

Patients with non-traumatic chest pain/ACS symptoms

### **AND**

• 35 years or older

#### **AND**

Had a prehospital 12 Lead ECG performed

#### AND

• Who were transported by EMS (to either a STEMI Referring Hospital or a STEMI Receiving Center

## Enter your numbers in the boxes below:

\$\{q://(\) Quarter 2 Denominator - Total number of patients who meet the above criteria (the denominator for the PLUS measure has been auto-populated based on the numerator volume entered for Measure 1)

Quarter 2 Numerator - Number of patients in the denominator volume who received a pre-hospital 12 lead ECG within 10 minutes

\* PLUS Measure: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable.

The number of patients included in the denominator volume who did not receive a pre-hospital 12 Lead ECG within 10 minutes of EMS First Medical Contact

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

Below is the percentage calculated based on the data that was input on the previous page.

Q2 Plus Measure Percentage: 0%

Click "Next" to enter your data for Quarter 3. If you would like to enter this data at a later time, please close your browser. **All data entered will be saved**. To re-access the application, use the unique application link.

### **QUARTER 3**

- \* Questions with an asterisk (\*) are mandatory. Enter a zero "0" when there is no data to report.
- \*Measure 1: Percentage of patients with non-traumatic chest pain/ACS symptoms (which may include chest pain or discomfort in other areas of the body of suspected cardiac origin, shortness of breath, sweating, nausea, vomiting, dizziness, and atypical or unusual symptoms) in patients ≥35 years of age, treated and transported by EMS who received a pre-hospital 12 Lead

### **Inclusion Criteria:**

Patients with non-traumatic chest pain/ACS symptoms

#### **AND**

• 35 years or older

#### **AND**

• Transported to a hospital

## Enter your numbers in the boxes below:

- Quarter 3 Denominator Volume- Total number of patients who meet the above criteria
- Quarter 3 Numerator Number of patients in the denominator volume who received a pre-hospital 12 lead ECG

## Measure 1: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume who did not receive a pre-hospital 12 Lead ECG

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 3 Outlier Volume

## Measure 1: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

Indication of the presence of cardiac arrest at any time during this EMS event

0 Quarter 3 Exclusions

### Quarter 3 Measure 2

## **Measure 1 Calculated Percentage for Quarter 3**

Below is the percentage calculated based on the data that was input on the previous page.

Q3 Measure 1 Percentage: 0%

\*Measure 2: The percentage of hospital notifications or 12 Lead ECG transmissions suggesting a STEMI alert (or Cardiac Cath Lab Activation), that are performed within 10 minutes of the first STEMI positive 12 Lead ECG in the field

### **Inclusion Criteria:**

• Patients 35 years or over

#### **AND**

•With a STEMI noted on pre-hospital ECG (either 1st pre-hospital 12 Lead ECG or Subsequent pre-hospital 12 Lead ECG)

#### **AND**

Transported to a hospital

Enter your numbers in the boxes below:

Quarter 3 Denominator Volume- Total number of patients who meet the above inclusion criteria

Quarter 3 Numerator - Number of patients in the denominator volume where the hospital notification/activation was performed within 10 minutes of the first STEMI Positive pre-hospital 12 Lead ECG

Measure 2: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, where the hospital notification/activation was performed in GREATER than 10 minutes of the first STEMI Positive pre-hospital 12 Lead ECG

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 3 Outlier Volume

## Measure 2: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport
- Indication of the presence of cardiac arrest at any time during this EMS event
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care

### **Quarter 3 Measure 3**

## Measure 2 Calculated Percentage for Quarter 3

Below is the percentage calculated based on the data that was input on the previous page.

Q3 Measure 2 Percentage: 0%

\*Measure 3: Percentage of patients treated and transported directly to a STEMI Receiving Center, with EMS First Medical Contact to device time ≤90 Minutes and/or EMS First Medical Contact to PCI ≤120 Minutes when transport time ≥45 minutes and Door to Balloon ≤30 Minutes. (When destination facility = STEMI Receiving Center)

## **Inclusion Criteria:**

• Patients 18 years of age or older

#### AND

With a STEMI noted on pre-hospital first ECG

## \*\*If STEMI noted on subsequent ECG:

- 1. Exclude from the denominator those patients who have an EMS FMC to PCI >90 minutes or >120 minutes when transport time >45 minutes
- Include those patients in the denominator with EMS First Medical Contact to device time <90 Minutes and/or EMS First Medical Contact to PCI <120 Minutes when transport time >45 minutes and Door to Balloon <30 Minutes.

### **AND**

Transported to a STEMI Receiving Center (Primary PCI)

### **AND**

Primary PCI was performed

## Enter your numbers in the boxes below:

0	Quarter 3 Denominator Volume - Total number of patients who meet the above
inclusi	on criteria
0	Quarter 3 Numerator - Number of patients in the denominator volume where
	First Medical Contact to device time ≤90 Minutes and/or EMS First Medical
Contac	ct to PCI ≤120 Minutes when transport time ≥45 minutes and Door to Balloon
<30 M	inutes

## Measure 3: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, where the total time from FMC (first medical contact) to device activation/Primary PCI was **GREATER** than 90 minutes or **GREATER** than 120 min where travel time was  $\geq$  45 min and D2B is  $\leq$  30 min

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 3 Outlier Volume

### Measure 3: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport (prehospital/in-hospital)
- Delay caused by patient experiencing cardiac arrest and the need for intubation (prehospital/in-hospital)
- Delay caused by initial prehospital ECGs being negative for STEMI
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care. (prehospital/in-hospital)
- Delay caused by difficulty in accessing femoral or radial artery (in the cath lab)

0 Quarter 3 Exclusions

### **Quarter 3 Measure 4**

## Measure 3 Calculated Percentage for Quarter 3

Below is the percentage calculated based on the data that was input on the previous page.

Q3 Measure 3 Percentage: 0%

\*Measure 4: Percentage of STEMI patients treated and transported to a STEMI Referring Hospital for reperfusion A) With a Door-to-Needle time of ≤30 Minutes OR B) Initial EMS FMC to PCI of the transfer for PCI patient ≤120 Minutes.

### **Inclusion Criteria:**

Patients 18 years of age or older

#### AND

With a STEMI noted on pre-hospital ECG

### **AND**

Transported to a STEMI Referring Center

### **AND**

Thrombolytics Administered

### **OR**

Patients are transported to a STEMI Receiving Center for Primary PCI

## Enter your numbers in the boxes below:

0	Quarter 3 Denominator Volume - Total number of patients wh	o meet the above
criteria		

Quarter 3 Numerator - Number of patients in the denominator volume treated for reperfusion A) With a Door-to-Needle time of  $\leq$ 30 Minutes OR B) Initial EMS FMC to PCI of the transfer for PCI patient  $\leq$ 120 Minutes

\*Measure 4: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, who were transported directly to a STEMI Referring center AND had fibrinolytic therapy administered in GREATER than 30 minutes OR transferred to a STEMI Receiving Center and had Primary PCI Performed in GREATER than 120 Minutes

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 3 Outlier Volume

## \*Measure 4: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport (prehospital/in hospital)
- Delay caused by patient experiencing cardiac arrest and the need for intubation (prehospital/in hospital)

- Delay caused by initial and/or subsequent ECGs being negative for STEMI (prehospital/in-hospital)
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care. (prehospital/in hospital)

0 Quarter 3 Exclusions

### **Quarter 3 PLUS Measure**

## Measure 4 Calculated Percentage for Quarter 3

Below is the percentage calculated based on the data that was input on the previous page.

Q3 Measure 4 Percentage: 0%

\* **PLUS Measure:** Of those patients reported in the EMS Measure 1 numerator (patients with an initial complaint of non-traumatic chest pain/ACS symptoms who are > 35 years of age who received a 12 Lead ECG), the percentage of 12 Lead ECG's performed with in 10 minutes of EMS First Medical Contact. (Required for reporting but not used for baseline recognition analysis)

## **Inclusion Criteria:**

Patients with non-traumatic chest pain/ACS symptoms

#### **AND**

• 35 years or older

### **AND**

Had a prehospital 12 Lead ECG performed

### **AND**

• Who were transported by EMS (to either a STEMI Referring Hospital or a STEMI Receiving Center

## Enter your numbers in the boxes below:

\$\{q://C \ Quarter 3 Denominator - Total number of patients who meet the above criteria (the denominator for the PLUS measure has been auto-populated based on the numerator volume entered for Measure 1)

Quarter 3 Numerator - Number of patients in the denominator volume who received a pre-hospital 12 lead ECG within 10 minutes

\*PLUS Measure: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable.

The number of patients included in the denominator volume who did not receive a pre-hospital 12 Lead ECG within 10 minutes of EMS First Medical Contact.

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 3 Outlier Volume

\*PLUS Measure: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

Delay caused by patient experiencing cardiac arrest and the need for intubation

0 Quarter 3 Exclusions

### **Quarter 4 Measure 1**

## Plus Measure Calculated Percentage for Quarter 3

Below is the percentage calculated based on the data that was input on the previous page.

Q3 Plus Measure Percentage: 0%

Click "Next" to enter your data for Quarter 4. If you would like to enter this data at a later time, please close your browser. **All data entered will be saved**. To re-access the application, use the unique application link.

## **QUARTER 4**

\* Questions with an asterisk (\*) are mandatory. Enter a zero "0" when there is no data to report.

\*Measure 1: Percentage of patients with non-traumatic chest pain/ACS symptoms (which may include chest pain or discomfort in other areas of the body of suspected cardiac origin, shortness of breath, sweating, nausea, vomiting, dizziness, and atypical or unusual symptoms) in patients ≥35 years of age, treated and transported by EMS who received a pre-hospital 12 Lead

### **Inclusion Criteria:**

Patients with non-traumatic chest pain/ACS symptoms

#### AND

• 35 years or older

#### **AND**

Transported to a hospital

Enter your numbers in the boxes below:

0	Quarter 4 Denominator Volume- Total number of patients who meet the above
inclus	on criteria
0	Quarter 4 Numerator - Number of patients in the denominator volume where
the ho	spital notification/activation was performed within 10 minutes of the first STEMI
Positiv	ve pre-hospital 12 Lead ECG

## Measure 2: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, where the hospital notification/activation was performed in GREATER than 10 minutes of the first STEMI Positive pre-hospital 12 Lead ECG

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 4 Outlier Volume

### Measure 2: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport
- Indication of the presence of cardiac arrest at any time during this EMS event
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care

0 Quarter 4 Exclusions

## Block 32

## Measure 2 Calculated Percentage for Quarter 4

Below is the percentage calculated based on the data that was input on the previous page.

Q4 Measure 2 Percentage: 0%

\*Measure 3: Percentage of patients treated and transported directly to a STEMI Receiving Center, with EMS First Medical Contact to device time ≤90 Minutes and/or EMS First Medical Contact to PCI ≤120 Minutes when transport time ≥45 minutes and Door to Balloon ≤30 Minutes. (When destination facility = STEMI Receiving Center)

### **Inclusion Criteria:**

• Patients 18 years of age or older

### **AND**

With a STEMI noted on pre-hospital first ECG

\*\*If STEMI noted on subsequent ECG:

- 1. Exclude from the denominator those patients who have an EMS FMC to PCI >90 minutes or >120 minutes when transport time >45 minutes
- Include those patients in the denominator with EMS First Medical Contact to device time <90 Minutes and/or EMS First Medical Contact to PCI <120 Minutes when transport time >45 minutes and Door to Balloon <30 Minutes.

### **AND**

• Transported to a STEMI Receiving Center (Primary PCI)

#### **AND**

Primary PCI was performed

## Enter your numbers in the boxes below:

Quarter 4 Denominator Volume - Total number of patients who meet the above inclusion criteria

Quarter 4 Numerator - Number of patients in the denominator volume where EMS First Medical Contact to device time ≤90 Minutes and/or EMS First Medical Contact to PCI ≤120 Minutes when transport time ≥45 minutes and Door to Balloon ≤30 Minutes

### Quarter 4 Measure 3

**Measure 3**: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, where the total time from FMC (first medical contact) to device activation/Primary PCI was **GREATER** than 90 minutes or **GREATER** than 120 min where travel time was  $\geq$  45 min and D2B is  $\leq$  30 min

Annual Plus Measure: 0%

### **Reporting Measures (Optional)**

**Reporting Measures (Optional)** These are optional measures, and reporting data can be done on a select number of the reporting measures or all of the reporting measures. Reporting measures could become future recognition measures.

**Reporting Measure A**: Percentage of patients with suspected stroke for whom advanced notification (Stroke alert) was provide to the destination hospital.

**Reporting Measure B:** Percentage of patients with suspected stroke, treated and transported, who had a documented last known well (LKW) time.

**Reporting Measure C:** Percentage of adult Out-Of-Hospital Cardiac Arrest (of suspected cardiac etiology), with ROSC in the field, with ROSC maintained to the ED, who has a 12 Lead ECG acquired

**Reporting Measure D:** Percentage of patients with non-traumatic chest pain/ACS symptoms (which may include chest pain or discomfort in other areas of the body (e.g. arm, jaw, epigastrium) of suspected cardiac origin, shortness of breath, sweating, nausea, vomiting, dizziness, and atypical or unusual symptoms) in patients >35 years of age, treated and transported by EMS who received Aspirin in the field, either by EMS or self-administration

Please provide responses regarding the reporting measures, in the following matrix even if data is not submitted for the reporting measures. Once the matrix is complete, respond Yes or No below to continue to provide reporting measure data.
