Get With The Guidelines® Public Reporting Achievement Measures

Program	2025 Data Measures
Afib	***Achievement Measures 85% or Greater*** • ACEI/ARB or ARNI Prescribed Prior to Discharge • CHA2DS2–VASc Risk Score Documented Prior to Discharge • Beta Blocker at Discharge • FDA Approved Anticoagulation Prescribed Prior to Discharge • Statin at Discharge in AF Patients with CAD, CVA/TIA or PVD, or Diabetes
Heart Failure	***Achievement Measures 85% or Greater*** • Evidence-Based Beta Blocker Prescribed at Discharge for HFrEF • Left Ventricular Function Assessed • Post-Discharge Appointment Scheduled ***Achievement Measures 50% or Greater*** • Angiotensin Receptor-Neprilysin Inhibitor (ARNi) Prescribed at Discharge for HFrEF • SGLT2 Inhibitor (SGLT2i) Prescribed at Discharge for HFrEF • Mineralocorticoid Receptor Antagonist (MRA) Prescribed at Discharge for HFrEF
Resus	***Achievement Measures 85% or Greater*** <u>Adult</u> • Confirmation of Airway Device Placement in Trachea • Time to First Shock ≤ 2 Minutes for VF or Pulseless VT First Documented Rhythm • Time to IV/IO Epinephrine ≤ 5 Minutes for Asystole or Pulseless Electrical Activity (PEA) • Pulseless Cardiac Events Monitored or Witnessed <u>Pediatric</u> • Confirmation of Airway Device Placement in Trachea • Time to First Chest Compressions ≤1 Minute • Time to IV/ IO Epinephrine ≤5 Minutes for Asystole or Pulseless Electrical Activity (PEA) • Pulseless Cardiac Events Occurred in ICU Setting <u>Neonate/Infant</u> • Confirmation of Airway Device Placement in Trachea • Time to First Chest Compressions ≤ 1 Minute • Time to IV/IO Epinephrine ≤5 Minutes for Asystole or Pulseless Electrical Activity (PEA) • Pulseless Cardiac Events Occurred in ICU Setting <u>Newly Born</u> • Confirmation of Airway Device Placement in Trachea • Advanced Airway Placed Prior to Initiation of Chest Compressions • Pulse Oximetry in Place Prior to Initiation of Chest Compressions • Time to Positive Pressure Ventilation < 1 Minute from CPA Recognition

Get With The Guidelines® Public Reporting Achievement Measures

Stroke	***Achievement Measures 85% or Greater*** • Anticoagulation Prescribed for AFIB/Aflutter at Discharge • Antithrombotic Prescribed at Discharge • Antithrombotics by End of Hospital Day 2 • Intensive Statin Prescribed at Discharge • IV Thrombolytics Arrive by 3.5 Hour, Treat by 4.5 Hour • Smoking Cessation • VTE Prophylaxis by End of Hospital Day 2 ***Quality Measure 75% or Greater*** • Time to intravenous thrombolytic therapy-60m* NOTE: While this is a quality measure, it is being included in public reporting due to strong process outcome link and status as a nationally endorsed NQF measure. *
CAD	***Achievement Measures 75% or Greater*** <u>STEMI Receiving</u> • Arrival to PCI ≤90 Minutes • Aspirin at Discharge • Beta Blocker at Discharge • ACEI/ARB at Discharge • Cardiac Rehab Referral from Inpatient Setting • High Intensity Statin at Discharge • EMS FMC to PCI ≤90 Minutes or ≤120 minutes when EMS Drive time ≥ 45 minutes and D2B ≤ 30 minutes • Arrival to 12 lead ECG ≤10 minutes ***Achievement Measures 50% or Greater*** • Arrival at First Hospital to PCI ≤120 minutes <u>STEMI Referring</u> • Aspirin at Arrival • Aspirin at Discharge • Arrival to 12-lead ECG within 10 minutes • Arrival to Fibrinolytic Administration ≤30 minutes • Door In-Door Out ≤ 45 minutes • ACEI/ARB at Discharge • Beta Blocker at Discharge • High Intensity Statin Therapy at Discharge • Smoking Cessation Counseling ***Achievement Measures 85% or Greater*** <u>NSTEMI</u> • Cardiac Rehab Referral • ACEI/ARB at Discharge • Left Ventricular Systolic Function Evaluated • Smoking Cessation Counseling ***Achievement Measures 65% or Greater*** • Dual Antiplatelet Therapy on Discharge (DAPT)

CAD Chest Pain	***Achievement Measures 75% or Greater*** • ECG within 10 Minutes of Arrival for Chest Pain Patients • Early Cardiac Troponin Results Within 90 Minutes of Arrival
