WE'RE WORKING AS A CATALYST FOR COMMUNITY IMPACT & CHANGE

At the American Heart Association, our mission is to create a world free of heart disease and stroke—the No. 1 and No. 5 killers of all Americans.

In **Wyoming**, we are improving and extending the lives of more than **50,000** people by building a culture of health in our community.

Here’s how we’re working to keep **Wyoming at Heart**.

---

**ADVOCACY**

Policy has the power to protect our health, improve communities and drive lasting change.

In 2015, we helped establish Stroke and STEMI hospital designations and development of EMS transport protocols.

We also worked to establish and gain funding for a $7.1 million statewide initiative to improve the system of care for Wyoming heart attack and cardiac arrest patients. Mission:Lifeline Wyoming helped shave 17 minutes from the time a patient reports heart attack symptoms to the time blood flow is restored to the heart.

---

**KIDS**

We’re working to ensure the littlest hearts are protected, as well as help children form healthy habits that will last a lifetime, by removing obstacles to making healthy choices.

**38,900** got jumping and moving in 111 Wyoming schools last year through AHA programs and curriculum.

---

EMS and hospital programs received quality healthcare awards for participating in our *Get With the Guidelines* programs.

**8**

**1,200+** people have invested in their health by using our online tools to get personalized health scores and recommendations.

**$294,000** was provided in funding for two projects in **Wyoming** institutions.

**10,422** adults and teenagers were trained last year in CPR, AED usage and basic lifesaving skills using AHA guidelines, methods and materials.

**2,000** **Wyoming residents** have joined our advocate networks and coalitions.
