2021 MISSION: LIFELINE EMS RECOGNITION APPLICATION

Welcome to the 2021 Mission: Lifeline® EMS Recognition web-based application.
Application period closes March 30, 2021 at 23:59.59 CT.

**ALL APPLICANTS PLEASE READ THE FOLLOWING GUIDANCE**

The Mission: Lifeline team at the American Heart Association is excited to continue recognizing EMS agencies for applying the most up-to-date evidence-based treatment guidelines to improve care and outcomes in the communities served.

Applicants can access the application as many times as needed until the application submission deadline on March 30, 2021 at 11:59pm CST, via the unique application link provided. Save this link as a favorite. Any data entered will be automatically saved, there is no save option. When re-accessing the application, the unique link will direct you to the place in the application where you last left off.

For issues with returning to an open application, please email Missionlifeline@heart.org for assistance.

Once the application is completed and submitted, the application will close and will not allow further access via the unique link. The application can be re-opened to make updates if needed via a new application link. The new link will
reset the application to first page and can any data can be revised and the application resubmitted. Requests to re-open an application after final submission will only be processed after the March 30, 2021 submission deadline. To request your application be re-opened please email Missionlifeline@heart.org or contact your local AHA Quality Improvement Manager.

For questions please email Missionlifeline@heart.org or reach out to your local AHA Quality Improvement Manager.

If ready to begin the application - scroll to the bottom of this introduction page and select YES then click NEXT.

Thank you for your participation in Mission: Lifeline EMS Recognition.

To access additional resources for 2021 Mission: Lifeline EMS Recognition please visit our Mission: Lifeline EMS Recognition web page.

American Heart Association
Mission:Lifeline®
EMS

Are you ready to begin the 2021 Mission: Lifeline EMS Application?

- YES (click the "Next" button in the lower right corner of your screen)
- NOT YET (please close your browser window)
Individual, Joint or Regional Application

Select the Application that will be completed and submitted.

- Individual Application (Stand alone or Team option)
- Joint Application (Stand alone or Team option)
- Regional Application

First Agency Contact Information (Individual or Joint Application)

AGENCY APPLICATION

* Please provide the contact and agency information of the individual who should receive the final Mission: Lifeline award notification. Note that the address you provide may be used as a point of reference for your agency in AHA-produced EMS Recognition maps.

For agencies who applied for recognition in 2020, we've inserted the contact agency you provided in the 2021 application. Feel free to make changes if necessary. Otherwise, if there are no changes, skip to the next question.

**If you selected Joint application please provide the information for the FIRST of the two EMS agencies submitting a joint application below. Then, you will be asked to provide the information for the SECOND agency.

**If you selected Regional application (multiple EMS agencies in the same geographical region), please provide the region name and contact information of the individual who should receive the final Mission: Lifeline award notification.

First name

Last name

First name

Last name
Title
Primary Contact's Email address
Secondary Email address
Phone number
Agency/Department/Region Name
Street Address
Street Address (Continued)
City
State (two-letter abbreviation)
Zip code
EMS Agency State ID Number
State (two-letter abbreviation) associated with above State ID

Did you make any changes to the contact information above?

☐ Yes, changes made to Primary Contact information
☐ Yes, changes made to Agency/Department/Region information
☐ Yes, changes made to Primary Contact and Agency/Department/Region information
☐ No

*Population served: (Please provide the approximate population served by your service area rounded to the nearest thousand, e.g. 45,000)

*Total annual call volume:
*Type of service: (for multiple agencies, select all that apply)

- Private Ambulance
- County or Municipal Fire
- Volunteer Fire
- County or Municipal EMS
- Hospital Based EMS
- Air
- Other

*Does your agency transport?*

- Yes
- No

* Pre-hospital type: (for multiple agencies, select all that apply)

- EMS Ground - Non-fire Department
- Air Ambulance
- Fire Department/EMS
- Medical First Responder (unable to transport)

* The American Heart Association has permission to publish the award status of this agency. By providing this authorization, it will remain in effect until written notice is provided to the American Heart Association or until program participation has ended. Below are some examples of where the award status might be published:
  
  - Recognition Events
  - Advertisements
  - Conference banners/signage
Second Agency Contact Information (Joint Application)

SECOND AGENCY
* Please provide the contact and agency information of the individual who should receive the final Mission: Lifeline award notification and is associated with the SECOND of the two EMS agencies submitting the Joint Application.

Primary Contact's Email address
Secondary Email address
Phone number
Agency/Department Name
Street Address
Street Address (Continued)
City
State (two-letter abbreviation)
Zip code
EMS Agency State ID Number
*Population served by the **SECOND** of the two agencies submitting via the Joint Application: *(Please provide the approximate population served by your service area rounded to the nearest thousand, e.g. 45,000)*

*Agency's total annual call volume for the **SECOND** of the two agencies submitting via the Joint Application:

*Type of service for the **SECOND** of the two agencies submitting via the Joint Application:

- Private Ambulance
- County or Municipal Fire
- Volunteer Fire
- County or Municipal EMS
- Hospital Based EMS
- Air
- Other

*Does your agency transport?*

- Yes
- No
* Pre-hospital type for the SECOND of the two agencies submitting via the Joint Application: (select one)

- EMS Ground - Non-fire Department
- Air Ambulance
- Fire Department/EMS
- Medical First Responder (12 Lead Capable)

* The American Heart Association has permission to publish the award status of SECOND agency. By providing this authorization, it will remain in effect until written notice is provided to the American Heart Association or until program participation has ended. Below are some examples of where the award status might be published:
  - Recognition Events
  - Advertisements
  - Conference banners/signage
  - AHA Websites, Mission: Lifeline Network, digital media, mobile apps

- AGREE (Please indicate (exactly how AHA should publish the SECOND agency's name):

- DO NOT AGREE

**STEMI Receiving or Referring Trigger**

* Please select transport destination of the STEMI patients that will be reported for Mission: Lifeline EMS Recognition:  *(check all that apply)*

- [ ] STEMI Receiving Center (Transports from the field to a PCI hospital(s)).
Quarter 1 Measure 1

QUARTER 1

* Questions with an asterisk (*) are mandatory. Enter a zero "0" when there is no data to report.

*Measure 1: Percentage of patients with non-traumatic chest pain/ACS symptoms (which may include chest pain or discomfort in other areas of the body of suspected cardiac origin, shortness of breath, sweating, nausea, vomiting, dizziness, and atypical or unusual symptoms) in patients >35 years of age, treated and transported by EMS who received a pre-hospital 12 Lead ECG

Inclusion Criteria:
• Patients with non-traumatic chest pain/ACS symptoms
AND
• 35 years or older
AND
• Transported to a hospital

Enter your numbers in the boxes below:

0 Quarter 1 Denominator Volume- Total number of patients who meet the above criteria
0 Quarter 1 Numerator - Number of patients in the denominator volume who received a pre-hospital 12 lead ECG
**Measure 1: Outlier Volume - Required if claiming exclusions**

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume who did not receive a pre-hospital 12 Lead ECG

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 1 Outlier Volume

**Measure 1: Exclusions**

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Indication of the presence of cardiac arrest at any time during this EMS event
Quarter 1 Measure 2

Measure 1 Calculated Percentage for Quarter 1

Below is the percentage calculated based on the data that was input on the previous page.

Quarter 1 Measure 1 Percentage: 0%

*Measure 2: The percentage of hospital notifications or 12 Lead ECG transmissions suggesting a STEMI alert (or Cardiac Cath Lab Activation), that are performed within 10 minutes of the first STEMI positive 12 Lead ECG in the field

Inclusion Criteria:
• Patients 35 years or over
  AND
• With a STEMI noted on pre-hospital ECG (either 1st pre-hospital 12 Lead ECG or Subsequent pre-hospital 12 Lead ECG)
  AND
• Transported to a hospital

Enter your numbers in the boxes below:

0 Quarter 1 Exclusions

0 Quarter 1 Denominator Volume- Total number of patients who meet the above inclusion criteria

0 Quarter 1 Numerator - Number of patients in the denominator volume where the hospital notification/activation was performed within 10 minutes of the first STEMI
Measure 2: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, where the hospital notification/activation was performed in **GREATER** than 10 minutes of the first STEMI Positive pre-hospital 12 Lead ECG

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0  Quarter 1 Outlier Volume

Measure 2: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:
Delay in patient or family providing consent for treatment and transport
Indication of the presence of cardiac arrest at any time during this EMS event
Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care

Quarter 1 Exclusions

Block 31

Measure 2 Calculated Percentage for Quarter 1

Below is the percentage calculated based on the data that was input on the previous page.

Quarter 1 Measure 2 Percentage: 0%

*Measure 3: Percentage of patients treated and transported directly to a STEMI Receiving Center, with EMS First Medical Contact to device time \( \leq 90 \) Minutes and/or EMS First Medical Contact to PCI \( \leq 120 \) Minutes when transport time \( > 45 \) minutes and Door to Balloon \( \leq 30 \) Minutes. (When destination facility = STEMI Receiving Center)

Inclusion Criteria:
  - Patients 18 years of age or older
  **AND**
  - With a STEMI noted on the pre-hospital first ECG

**If STEMI noted on subsequent ECG:
1. Exclude from the denominator those patients who have an EMS FMC to PCI $>90$ minutes or $>120$ minutes when transport time $>45$ minutes.
2. Include those patients in the denominator with EMS First Medical Contact to device time $\leq 90$ Minutes and/or EMS First Medical Contact to PCI $\leq 120$ Minutes when transport time $>45$ minutes and Door to Balloon $\leq 30$ Minutes.
3. 

AND

• Transported to a STEMI Receiving Center (Primary PCI)

AND

• Primary PCI was performed

Enter your numbers in the boxes below:

- Quarter 1 Denominator Volume: 0 - Total number of patients who meet the above inclusion criteria
- Quarter 1 Numerator: 0 - Number of patients in the denominator volume where EMS First Medical Contact to device time $<90$ Minutes and/or EMS First Medical Contact to PCI $\leq 120$ Minutes when transport time $>45$ minutes and Door to Balloon $\leq 30$ Minutes

Quarter 1 Measure 3

Measure 3: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.
The number of patients included in the denominator volume, where the total time from FMC (first medical contact) to device activation/Primary PCI was GREATER than 90 minutes or GREATER than 120 min where travel time was ≥ 45 min and D2B is ≤ 30 min

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

Quarter 1 Outlier Volume

**Measure 3: Exclusions**

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport (prehospital/in-hospital)
- Delay caused by patient experiencing cardiac arrest and the need for intubation (prehospital/in-hospital)
- Delay caused by initial prehospital ECGs being negative for STEMI
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care. (prehospital/in-hospital)
- Delay caused by difficulty in accessing femoral or radial artery (in the cath lab)

0 Quarter 1 Exclusions

Q1 Measure 4

Measure 3 Calculated Percentage for Quarter 1

Below is the percentage calculated based on the data that was input on the previous page.

Quarter 1 Measure 3 Percentage: 0%

*Measure 4: Percentage of STEMI patients treated and transported to a STEMI Referring Hospital for reperfusion A) With a Door-to-Needle time of \( \leq 30 \) Minutes OR B) Initial EMS FMC to PCI of the transfer for PCI patient \( \leq 120 \) Minutes.

Inclusion Criteria:
- Patients 18 years of age or older
  AND
- With a STEMI noted on pre-hospital ECG
  AND
- Transported to a STEMI Referring Center
  AND
- Thrombolytics Administered
  OR
- Patients are transported to a STEMI Receiving Center for Primary PCI
Enter your numbers in the boxes below:

0  Quarter 1 Denominator Volume - Total number of patients who meet the above criteria

0  Quarter 1 Numerator - Number of patients in the denominator volume treated for reperfusion A) With a Door-to-Needle time of \(<30\) Minutes OR B) Initial EMS FMC to PCI of the transfer for PCI patient \(<120\) Minutes

*Measure 4:  Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, who were transported directly to a STEMI Referring center AND had fibrinolytic therapy administered in GREATER than 30 minutes OR transferred to a STEMI Receiving Center and had Primary PCI Performed in GREATER than 120 Minutes

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0  Quarter 1 Outlier Volume

*Measure 4:  Exclusions
Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport (prehospital/in hospital)
- Delay caused by patient experiencing cardiac arrest and the need for intubation (prehospital/in hospital)
- Delay caused by initial and/or subsequent ECGs being negative for STEMI (prehospital/in-hospital)
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care. (prehospital/in hospital)

0 Quarter 1 Exclusions

**Q1 Plus Measure**

**Measure 4 Calculated Percentage for Quarter 1**

Below is the percentage calculated based on the data that was input on the previous page.

Quarter 1 Measure 4 Percentage: 0%

*PLUS Measure*: Of those patients reported in the EMS Measure 1 numerator (patients with an initial complaint of non-traumatic chest pain/ACS symptoms who are ≥ 35 years of age who received a 12 Lead ECG), the percentage of 12
Lead ECG’s **performed with in 10 minutes** of EMS First Medical Contact. (Required for reporting but not used for baseline recognition analysis)

**Inclusion Criteria:**
- Patients with non-traumatic chest pain/ACS symptoms
  **AND**
- 35 years or older
  **AND**
- Had a prehospital 12 Lead ECG performed
  **AND**
- Who were transported by EMS (to either a STEMI Referring Hospital or a STEMI Receiving Center)

**Enter your numbers in the boxes below:**

- **Quarter 1 Denominator** - Total number of patients who meet the above criteria (the denominator for the PLUS measure has been auto-populated based on the numerator volume entered for Measure 1)
- **Quarter 1 Numerator** - Number of patients in the denominator volume who received a pre-hospital 12 lead ECG within 10 minutes

**PLUS Measure:** Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, who did not receive a 12 Lead ECG within 10 minutes of EMS First Medical Contact.

Check the math: Adding the outlier volumes to the numerator volumes will equal
the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 1 Outlier Volume

*PLUS Measure: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay caused by the patient experiencing cardiac arrest and the need for intubation

0 Quarter 1 Exclusions

Quarter 2 Measure 1

Plus Measure Calculated Percentage for Quarter 1

Below is the percentage calculated based on the data that was input on the previous page.

Quarter 1 Plus Measure Percentage: 0%
Click "Next" to enter your data for Quarter 2. If you would like to enter this data at a later time, please close your browser. **All data entered will be saved.** To re-access the application, use the unique application link.

**QUARTER 2**

* Questions with an asterisk (*) are mandatory. *Enter a zero "0" when there is no data to report.*

*Measure 1*: Percentage of patients with non-traumatic chest pain/ACS symptoms (which may include chest pain or discomfort in other areas of the body of suspected cardiac origin, shortness of breath, sweating, nausea, vomiting, dizziness, and atypical or unusual symptoms) in patients ≥35 years of age, treated and transported by EMS who received a pre-hospital 12 Lead

**Inclusion Criteria:**
- Patients with non-traumatic chest pain/ACS symptoms
  AND
- 35 years or older
  AND
- Transported to a hospital

**Enter your numbers in the boxes below:**

[ ] Quarter 2 Denominator Volume- Total number of patients who meet the above criteria

[ ] Quarter 2 Numerator - Number of patients in the denominator volume who received a pre-hospital 12 lead ECG
Measure 1: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume who did not receive a pre-hospital 12 Lead ECG

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 2 Outlier Volume

Measure 1: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Indication of the presence of cardiac arrest at any time during this EMS event

0 Quarter 2 Exclusions
Quarter 2 Measure 2

Measure 1 Calculated Percentage for Quarter 2

Below is the percentage calculated based on the data that was input on the previous page.

Q2 Measure 1 Percentage: 0%

*Measure 2: The percentage of hospital notifications or 12 Lead ECG transmissions suggesting a STEMI alert (or Cardiac Cath Lab Activation), that are performed within 10 minutes of the first STEMI positive 12 Lead ECG in the field

Inclusion Criteria:

• Patients 35 years or over
  AND
• With a STEMI noted on pre-hospital ECG (either 1st pre-hospital 12 Lead ECG or Subsequent pre-hospital 12 Lead ECG)
  AND
• Transported to a hospital

Enter your numbers in the boxes below:

[ 0 ] Quarter 2 Denominator Volume- Total number of patients who meet the above inclusion criteria

[ 0 ] Quarter 2 Numerator - Number of patients in the denominator volume where the hospital notification/activation was performed within 10 minutes of the first STEMI Positive pre-hospital 12 Lead ECG
**Measure 2: Outlier Volume - Required if claiming exclusions**

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, where the hospital notification/activation was performed in GREATER than 10 minutes of the first STEMI Positive pre-hospital 12 Lead ECG

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 2 Outlier Volume

**Measure 2: Exclusions**

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport
• Indication of the presence of cardiac arrest at any time during this EMS event
• Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care

Quarter 2 Measure 3

Measure 2 Calculated Percentage for Quarter 2

Below is the percentage calculated based on the data that was input on the previous page.

Q2 Measure 2 Percentage: 0%

*Measure 3: Percentage of patients treated and transported directly to a STEMI Receiving Center, with EMS First Medical Contact to device time \( \leq \) 90 Minutes and/or EMS First Medical Contact to PCI \( \leq \) 120 Minutes when transport time \( \geq \) 45 minutes and Door to Balloon \( \leq \) 30 Minutes. (When destination facility = STEMI Receiving Center)

Inclusion Criteria:
• Patients 18 years of age or older
  AND
• With a STEMI noted on pre-hospital first ECG

**If STEMI noted on subsequent ECG:
Exclude from the denominator those patients who have an EMS FMC to PCI >90 minutes or >120 minutes when transport time >45 minutes. Include those patients in the denominator with EMS First Medical Contact to device time <90 Minutes and/or EMS First Medical Contact to PCI <120 Minutes when transport time >45 minutes and Door to Balloon <30 Minutes.

AND

• Transported to a STEMI Receiving Center (Primary PCI)

AND

• Primary PCI was performed

Enter your numbers in the boxes below:

Quarter 2 Denominator Volume - Total number of patients who meet the above inclusion criteria

Quarter 2 Numerator - Number of patients in the denominator volume where EMS First Medical Contact to device time <90 Minutes and/or EMS First Medical Contact to PCI <120 Minutes when transport time >45 minutes and Door to Balloon <30 Minutes

Measure 3: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, where the total time from FMC (first medical contact) to device activation/Primary PCI was GREATER than 90 minutes or GREATER than 120 min where travel time was ≥ 45 min and D2B is ≤ 30 min
Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 2 Outlier Volume

**Measure 3: Exclusions**

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport (prehospital/in-hospital)
- Delay caused by patient experiencing cardiac arrest and the need for intubation (prehospital/in-hospital)
- Delay caused by initial prehospital ECGs being negative for STEMI
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care. (prehospital/in-hospital)
- Delay caused by difficulty in accessing femoral or radial artery (in the cath lab)

0 Quarter 2 Exclusions
Quarter 2 Measure 4

Measure 3 Calculated Percentage for Quarter 2

Below is the percentage calculated based on the data that was input on the previous page.

Q2 Measure 3 Percentage: 0%

*Measure 4: Percentage of STEMI patients treated and transported to a STEMI Referring Hospital for reperfusion A) With a Door-to-Needle time of ≤30 Minutes OR B) Initial EMS FMC to PCI of the transfer for PCI patient ≤120 Minutes.

Inclusion Criteria:
• Patients 18 years of age or older
  AND
• With a STEMI noted on pre-hospital ECG
  AND
• Transported to a STEMI Referring Center
  AND
• Thrombolytics Administered
  OR
• Patients are transported to a STEMI Receiving Center for Primary PCI

Enter your numbers in the boxes below:

0 Quarter 2 Denominator Volume - Total number of patients who meet the above criteria
0 Quarter 2 Numerator - Number of patients in the denominator volume treated for reperfusion A) With a Door-to-Needle time of ≤30 Minutes OR B) Initial EMS FMC to PCI of the transfer for PCI patient ≤120 Minutes
*Measure 4:  Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, who were transported directly to a STEMI Referring center AND had fibrinolytic therapy administered in GREATER than 30 minutes OR transferred to a STEMI Receiving Center and had Primary PCI Performed in GREATER than 120 Minutes

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 2 Outlier Volume

*Measure 4:  Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:
• Delay in patient or family providing consent for treatment and transport (prehospital/in hospital)
• Delay caused by patient experiencing cardiac arrest and the need for intubation (prehospital/in hospital)
• Delay caused by initial and/or subsequent ECGs being negative for STEMI (prehospital/in-hospital)
• Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care. (prehospital/in hospital)

0 Quarter 2 Exclusions

Q2 Plus Measure

Measure 4 Calculated Percentage for Quarter 2

Below is the percentage calculated based on the data that was input on the previous page.

Q2 Measure 4 Percentage: 0%

* PLUS Measure: Of those patients reported in the EMS Measure 1 numerator (patients with an initial complaint of non-traumatic chest pain/ACS symptoms who are > 35 years of age who received a 12 Lead ECG), the percentage of 12 Lead ECG’s performed with in 10 minutes of EMS First Medical Contact. (Required for reporting but not used for baseline recognition analysis)

Inclusion Criteria:
• Patients with non-traumatic chest pain/ACS symptoms
AND
• 35 years or older

AND

• Had a prehospital 12 Lead ECG performed

AND

• Who were transported by EMS (to either a STEMI Referring Hospital or a STEMI Receiving Center

Enter your numbers in the boxes below:

Quarter 2 Denominator - Total number of patients who meet the above criteria (the denominator for the PLUS measure has been auto-populated based on the numerator volume entered for Measure 1)

0 Quarter 2 Numerator - Number of patients in the denominator volume who received a pre-hospital 12 lead ECG within 10 minutes

* PLUS Measure: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable.

The number of patients included in the denominator volume who did not receive a pre-hospital 12 Lead ECG within 10 minutes of EMS First Medical Contact

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.
**PLUS Measure: Exclusions**

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay caused by the patient experiencing cardiac arrest and the need for intubation

0 Quarter 2 Exclusions

**Quarter 3 Measure 1**

**Plus Measure Calculated Percentage for Quarter 2**

Below is the percentage calculated based on the data that was input on the previous page.

Q2 Plus Measure Percentage: 0%

Click "Next" to enter your data for Quarter 3. If you would like to enter this data at a later time, please close your browser. All data entered will be saved. To re-access the application, use the the unique application link.
*Questions with an asterisk (*) are mandatory. Enter a zero "0" when there is no data to report.*

**Measure 1**: Percentage of patients with non-traumatic chest pain/ACS symptoms (which may include chest pain or discomfort in other areas of the body of suspected cardiac origin, shortness of breath, sweating, nausea, vomiting, dizziness, and atypical or unusual symptoms) in patients ≥35 years of age, treated and transported by EMS who received a pre-hospital 12 Lead ECG.

**Inclusion Criteria:**
- Patients with non-traumatic chest pain/ACS symptoms
- AND
- 35 years or older
- AND
- Transported to a hospital

**Enter your numbers in the boxes below:**

- **Quarter 3 Denominator Volume**: Total number of patients who meet the above criteria
- **Quarter 3 Numerator**: Number of patients in the denominator volume who received a pre-hospital 12 lead ECG

**Measure 1: Outlier Volume** - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.
The number of patients included in the denominator volume who did not receive a pre-hospital 12 Lead ECG

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 3 Outlier Volume

**Measure 1: Exclusions**

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Indication of the presence of cardiac arrest at any time during this EMS event

0 Quarter 3 Exclusions

**Quarter 3 Measure 2**
Measure 1 Calculated Percentage for Quarter 3

Below is the percentage calculated based on the data that was input on the previous page.

Q3 Measure 1 Percentage: 0%

*Measure 2: The percentage of hospital notifications or 12 Lead ECG transmissions suggesting a STEMI alert (or Cardiac Cath Lab Activation), that are performed within 10 minutes of the first STEMI positive 12 Lead ECG in the field

Inclusion Criteria:
• Patients 35 years or over
  AND
• With a STEMI noted on pre-hospital ECG (either 1st pre-hospital 12 Lead ECG or Subsequent pre-hospital 12 Lead ECG)
  AND
• Transported to a hospital

Enter your numbers in the boxes below:

Quarter 3 Denominator Volume- Total number of patients who meet the above inclusion criteria

Quarter 3 Numerator - Number of patients in the denominator volume where the hospital notification/activation was performed within 10 minutes of the first STEMI Positive pre-hospital 12 Lead ECG

Measure 2: Outlier Volume - Required if claiming exclusions
This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, where the hospital notification/activation was performed in GREATER than 10 minutes of the first STEMI Positive pre-hospital 12 Lead ECG

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 3 Outlier Volume

**Measure 2:** Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport
- Indication of the presence of cardiac arrest at any time during this EMS event
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care
Quarter 3 Measure 3

Measure 2 Calculated Percentage for Quarter 3

Below is the percentage calculated based on the data that was input on the previous page.

Q3 Measure 2 Percentage: 0%

*Measure 3: Percentage of patients treated and transported directly to a STEMI Receiving Center, with EMS First Medical Contact to device time ≤90 Minutes and/or EMS First Medical Contact to PCI ≤120 Minutes when transport time >45 minutes and Door to Balloon ≤30 Minutes. (When destination facility = STEMI Receiving Center)

Inclusion Criteria:
• Patients 18 years of age or older

AND
• With a STEMI noted on pre-hospital first ECG

**If STEMI noted on subsequent ECG:

1. Exclude from the denominator those patients who have an EMS FMC to PCI >90 minutes or >120 minutes when transport time >45 minutes
2. Include those patients in the denominator with EMS First Medical Contact to device time <90 Minutes and/or EMS First Medical Contact to PCI <120 Minutes when transport time >45 minutes and Door to Balloon <30 Minutes.
AND
• Transported to a STEMI Receiving Center (Primary PCI)
AND
• Primary PCI was performed

Enter your numbers in the boxes below:

0 Quarter 3 Denominator Volume - Total number of patients who meet the above inclusion criteria

0 Quarter 3 Numerator - Number of patients in the denominator volume where EMS First Medical Contact to device time ≤90 Minutes and/or EMS First Medical Contact to PCI ≤120 Minutes when transport time ≥45 minutes and Door to Balloon ≤30 Minutes

**Measure 3**: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, where the total time from FMC (first medical contact) to device activation/Primary PCI was **GREATER** than 90 minutes or **GREATER** than 120 min where travel time was ≥45 min and D2B is ≤30 min

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. **Outlier Volume + Numerator Volume = Denominator Volume**
If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

Quarter 3 Outlier Volume

Measure 3: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport (prehospital/in-hospital)
- Delay caused by patient experiencing cardiac arrest and the need for intubation (prehospital/in-hospital)
- Delay caused by initial prehospital ECGs being negative for STEMI
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care. (prehospital/in-hospital)
- Delay caused by difficulty in accessing femoral or radial artery (in the cath lab)

Quarter 3 Exclusions

Quarter 3 Measure 4

Measure 3 Calculated Percentage for Quarter 3
Below is the percentage calculated based on the data that was input on the previous page.

Q3 Measure 3 Percentage: 0%

*Measure 4: Percentage of STEMI patients treated and transported to a STEMI Referring Hospital for reperfusion A) With a Door-to-Needle time of ≤30 Minutes OR B) Initial EMS FMC to PCI of the transfer for PCI patient ≤120 Minutes.

**Inclusion Criteria:**

- Patients 18 years of age or older
- With a STEMI noted on pre-hospital ECG
- Transferred to a STEMI Referring Center
- Thrombolytics Administered

**OR**

- Patients are transported to a STEMI Receiving Center for Primary PCI

**Enter your numbers in the boxes below:**

- 0 Quarter 3 Denominator Volume - Total number of patients who meet the above criteria
- 0 Quarter 3 Numerator - Number of patients in the denominator volume treated for reperfusion A) With a Door-to-Needle time of ≤30 Minutes OR B) Initial EMS FMC to PCI of the transfer for PCI patient ≤120 Minutes

*Measure 4: Outlier Volume - Required if claiming exclusions
This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, who were transported directly to a STEMI Referring center AND had fibrinolytic therapy administered in GREATER than 30 minutes OR transferred to a STEMI Receiving Center and had Primary PCI Performed in GREATER than 120 Minutes

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 3 Outlier Volume

*Measure 4: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport (prehospital/in hospital)
- Delay caused by patient experiencing cardiac arrest and the need for intubation (prehospital/in hospital)
Delay caused by initial and/or subsequent ECGs being negative for STEMI (prehospital/in-hospital)
Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care. (prehospital/in hospital)

Quarter 3 Exclusions

Quarter 3 PLUS Measure

Measure 4 Calculated Percentage for Quarter 3

Below is the percentage calculated based on the data that was input on the previous page.

Q3 Measure 4 Percentage: 0%

* PLUS Measure: Of those patients reported in the EMS Measure 1 numerator (patients with an initial complaint of non-traumatic chest pain/ACS symptoms who are > 35 years of age who received a 12 Lead ECG), the percentage of 12 Lead ECG’s performed with in 10 minutes of EMS First Medical Contact. (Required for reporting but not used for baseline recognition analysis)

Inclusion Criteria:
• Patients with non-traumatic chest pain/ACS symptoms
  AND
• 35 years or older
  AND
• Had a prehospital 12 Lead ECG performed
  AND
• Who were transported by EMS (to either a STEMI Referring Hospital or a STEMI Receiving Center

**Enter your numbers in the boxes below:**

<table>
<thead>
<tr>
<th>Quarter 3 Denominator - Total number of patients who meet the above criteria (the denominator for the PLUS measure has been auto-populated based on the numerator volume entered for Measure 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Quarter 3 Numerator - Number of patients in the denominator volume who received a pre-hospital 12 lead ECG within 10 minutes</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
</tr>
</tbody>
</table>

**PLUS Measure:** Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable.

The number of patients included in the denominator volume who did not receive a pre-hospital 12 Lead ECG within 10 minutes of EMS First Medical Contact.

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

**PLUS Measure:** Exclusions
Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay caused by patient experiencing cardiac arrest and the need for intubation

Quarter 3 Exclusions

0

Quarter 4 Measure 1

Plus Measure Calculated Percentage for Quarter 3

Below is the percentage calculated based on the data that was input on the previous page.

Q3 Plus Measure Percentage: 0%

Click "Next" to enter your data for Quarter 4. If you would like to enter this data at a later time, please close your browser. All data entered will be saved. To re-access the application, use the the unique application link.

QUARTER 4

* Questions with an asterisk (*) are mandatory. Enter a zero "0" when there is no data to report.
*Measure 1*: Percentage of patients with non-traumatic chest pain/ACS symptoms (which may include chest pain or discomfort in other areas of the body of suspected cardiac origin, shortness of breath, sweating, nausea, vomiting, dizziness, and atypical or unusual symptoms) in patients \( \geq 35 \) years of age, treated and transported by EMS who received a pre-hospital 12 Lead ECG

**Inclusion Criteria:**

- Patients with non-traumatic chest pain/ACS symptoms
  
  **AND**
  
  - 35 years or older
  
  **AND**
  
  - Transported to a hospital

**Enter your numbers in the boxes below:**

- **Quarter 4 Denominator Volume**: Total number of patients who meet the above criteria
  
  0

- **Quarter 4 Numerator**: Number of patients in the denominator volume who received a pre-hospital 12 lead ECG
  
  0

*Measure 1*: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume who did not receive a pre-hospital 12 Lead ECG

Check the math: Adding the outlier volumes to the numerator volumes will equal
the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

If the "Back" button is used to update denominator and/or numerator values, update Outlier volume manually.

0 Quarter 3 Outlier Volume

*Measure 1: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Indication of the present of cardiac arrest at any time during this EMS event

0 Quarter 3 Exclusions

Quarter 4 Measure 2

Measure 1 Calculated Percentage for Quarter 4

Below is the percentage calculated based on the data that was input on the previous page.

Q4 Measure 1 Percentage: 0%
*Measure 2:* The percentage of hospital notifications or 12 Lead ECG transmissions suggesting a STEMI alert (or Cardiac Cath Lab Activation), that are performed within 10 minutes of the first STEMI positive 12 Lead ECG in the field

**Inclusion Criteria:**

- Patients 35 years or over
  
  **AND**
  
  - With a STEMI noted on pre-hospital ECG (either 1st pre-hospital 12 Lead ECG or Subsequent pre-hospital 12 Lead ECG)
  
  **AND**
  
  - Transported to a hospital

Enter your numbers in the boxes below:

- **Quarter 4 Denominator Volume - Total number of patients who meet the above inclusion criteria**: 0

- **Quarter 4 Numerator - Number of patients in the denominator volume where the hospital notification/activation was performed within 10 minutes of the first STEMI Positive pre-hospital 12 Lead ECG**: 0

**Measure 2: Outlier Volume - Required if claiming exclusions**

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, where the hospital notification/activation was performed in GREATER than 10 minutes of the first STEMI Positive pre-hospital 12 Lead ECG
Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

0 Quarter 4 Outlier Volume

Measure 2: Exclusions

Of the patients reported in the Outlier Volume, can one or more of the following allowable exclusions be applied to the patient(s)?

If so, provide the total number of individual patients having one or more of the allowable exclusions as stated below:

- Delay in patient or family providing consent for treatment and transport
- Indication of the presence of cardiac arrest at any time during this EMS event
- Delay caused by the patient also being a trauma victim or having other time-sensitive comorbid condition requiring priority care

0 Quarter 4 Exclusions

Block 32
Measure 2 Calculated Percentage for Quarter 4

Below is the percentage calculated based on the data that was input on the previous page.

Q4 Measure 2 Percentage: 0%

*Measure 3:  Percentage of patients treated and transported directly to a STEMI Receiving Center, with EMS First Medical Contact to device time ≤90 Minutes and/or EMS First Medical Contact to PCI ≤120 Minutes when transport time >45 minutes and Door to Balloon ≤30 Minutes. (When destination facility = STEMI Receiving Center)

Inclusion Criteria:
• Patients 18 years of age or older
 AND
• With a STEMI noted on pre-hospital first ECG

**If STEMI noted on subsequent ECG:

1. Exclude from the denominator those patients who have an EMS FMC to PCI >90 minutes or >120 minutes when transport time >45 minutes
2. Include those patients in the denominator with EMS First Medical Contact to device time <90 Minutes and/or EMS First Medical Contact to PCI <120 Minutes when transport time >45 minutes and Door to Balloon <30 Minutes.

 AND
• Transported to a STEMI Receiving Center (Primary PCI)
 AND
• Primary PCI was performed
Enter your numbers in the boxes below:

Quarter 4 Denominator Volume - Total number of patients who meet the above inclusion criteria

Quarter 4 Numerator - Number of patients in the denominator volume where EMS First Medical Contact to device time ≤90 Minutes and/or EMS First Medical Contact to PCI ≤120 Minutes when transport time >45 minutes and Door to Balloon ≤30 Minutes

Quarter 4 Measure 3

Measure 3: Outlier Volume - Required if claiming exclusions

This section has been auto-populated based on the values entered for the measure numerator and denominator. Proceed to the next question to document any allowable exclusions.

The number of patients included in the denominator volume, where the total time from FMC (first medical contact) to device activation/Primary PCI was GREATER than 90 minutes or GREATER than 120 min where travel time was ≥45 min and D2B is ≤30 min

Check the math: Adding the outlier volumes to the numerator volumes will equal the denominator volume. Outlier Volume + Numerator Volume = Denominator Volume

Reporting Measures (Optional)

These are optional measures, and reporting data can be done on a select number of the reporting measures or all of the reporting measures. Reporting measures could become future recognition measures.

**Reporting Measure A:** Percentage of patients with suspected stroke for whom advanced notification (Stroke alert) was provided to the destination hospital.

**Reporting Measure B:** Percentage of patients with suspected stroke, treated and transported, who had a documented last known well (LKW) time.

**Reporting Measure C:** Percentage of adult Out-Of-Hospital Cardiac Arrest (of suspected cardiac etiology), with ROSC in the field, with ROSC maintained to the ED, who has a 12 Lead ECG acquired.

**Reporting Measure D:** Percentage of patients with non-traumatic chest pain/ACS symptoms (which may include chest pain or discomfort in other areas of the body (e.g. arm, jaw, epigastrium) of suspected cardiac origin, shortness of breath, sweating, nausea, vomiting, dizziness, and atypical or unusual symptoms) in patients >35 years of age, treated and transported by EMS who received Aspirin in the field, either by EMS or self-administration.

Please provide responses regarding the reporting measures, in the following matrix even if data is not submitted for the reporting measures. Once the matrix is complete, respond Yes or No below to continue to provide reporting measure data.

<table>
<thead>
<tr>
<th>Reporting Measure A</th>
<th>This data/information is tracked but cannot be provided at this time</th>
<th>This data/information has not been tracked in the past, but will be tracked in the future</th>
<th>Unable to track because data needed is not provided by the hospitals</th>
<th>Tracking this data is not useful to our agency (agencies)</th>
<th>Ot</th>
</tr>
</thead>
</table>
For any or all reporting measures that are tracked, the numerators and denominators should be submitted for the entire calendar year (1/1/20 - 12/31/20). Calculations will be automatically performed in the application itself.

Select **YES** below to continue with submitting data for any or all of the 2021 Mission: Lifeline EMS reporting measures?

- [ ] Yes, Continue
- [ ] No - The Mission: Lifeline EMS Reporting Measure Section will be skipped

**Reporting Measure A:** Percentage of patients with suspected stroke for whom advanced notification (Stroke alert) was provided to the destination hospital.

**Inclusion Criteria:**
- Patients assessed and transported by EMS
  - **AND**
  - Who had an EMS primary impression of suspected stroke

Numerator Value

Click the NEXT button below to formally submit the application responses.

After clicking NEXT, a PDF version of the application will be available to download. PLEASE download and save this PDF copy of your application and the responses for future reference if needed. Upon review of the PDF, if there are any errors noticed in the data and/or information submitted, application re-open requests will be accepted after March 30, 2021. To make a request please contact Missionlifeline@heart.org or reach out to your local AHA Quality Improvement Manager.

The 2021 application submissions will be reviewed starting immediately after the close of the application period. The application period closes at 11:59:59pm Central March 30, 2021.

Notification of Mission: Lifeline EMS achievement will take place in early May 2021.

If there are any questions, contact Mission: Lifeline at Missionlifeline@heart.org.

Thank you for participating in Mission: Lifeline EMS Recognition!
Final Message

Click the NEXT Button below to view the application responses and scroll to the top of the page to download a PDF version of the submitted application.

After the application is submitted, if an applicant needs to re-access the application, a request can be made to MissionLifeline@heart.org after March 30, 2021.
