# HOW TO QUIT TOBACCO

## 1. EDUCATE YOURSELF

The first step to quitting smoking, vaping and using tobacco is to understand the risks and health effects for you and your family.

- Smoking is the most preventable cause of death in the U.S. It’s linked to about one third of all deaths from heart disease and 90% of lung cancers.
- Cigarettes, e-cigarettes and tobacco products contain many toxic chemicals, as do their smoke, vapor and liquids.
- About half of U.S. children ages 3-11 are exposed to secondhand smoke and vapor.
- Tobacco use and nicotine addiction is a growing crisis for teens and young adults.
- You can be one of the millions of people who successfully quit every year.
- Within 1 year after quitting, your risk of heart disease goes down by half.

## 2. MAKE A PLAN TO QUIT

You’re more likely to quit tobacco for good if you prepare by creating a plan that fits your lifestyle.

- **SET** a quit date within the next 7 days.
- **CHOOSE** a method: cold turkey or gradually.
- **DECIDE** if you need help from a health care provider, nicotine replacement or medicine.
- **PREPARE** for your quit day by planning how to deal with cravings and urges.
- **QUIT** on your quit day.

## 3. TIPS FOR SUCCESS

### DEAL WITH URGES

Whether physical or mental, learn your triggers and make a plan to address them. Avoid situations that make you want to smoke or use tobacco until you’re confident that you can handle them.

### GET ACTIVE
